

**Permanent Open MRI**

# Elixbo PM 545

- Permanent Open MRI 0.45 Tesla
- Patient weight up to 200 kg
- Approval: FDA, CE, ETL, CFDA
- Magnet homogeneity is less than 1 PPM
- DBT (Dynamic Balance Technology)
- Low Power Consumption
- Achieve high resolution and high SNR
- Accurate gradient, Precise the slice Extensive clinical application
- Small installation Space, Fast installation
- RF Coil are Automatic Active decoupling Technologies
- Total weight: 12 Ton
- Ergonomic design Improves Patient s' Comfort and doctors' work efficiency
- Full body RF Coils
- Up to 4 Channels
- Remote control table
- **Elixbo PM545 is the same Model as GE Brivo MR 245**

# Elixbo PM335

- Permanent Open MRI 0.35 Tesla
- Patient weight up to 200 kg
- Magnet homogeneity is less than 1 PPM
- DBT (Dynamic Balance Technology)
- Low Power Consumption
- Achieve high resolution and high SNR
- Accurate gradient, Precise the slice Extensive clinical application
- Small installation Space, Fast installation
- RF Coil are Automatic Active decoupling Technologies
- Total weight: 12 Ton
- Ergonomic design Improves Patient s' Comfort and doctors' work efficiency
- Full body RF Coils
- Up to 4 Channels
- Remote control table
- **Elixbo PM335 is the same Model as GE Brivo MR 235**

# VIVI X330

- Permanent Open MRI 0.3 Tesla
- Patient weight up to 200 kg
- Compact Design, Full Applications
- Magnet homogeneity is less than 1 PPM
- DBT (Dynamic Balance Technology)
- Low Power Consumption
- Achieve high resolution and high SNR
- Accurate gradient, Precise the slice Extensive clinical application
- Small installation Space, Fast installation
- RF Coil are Automatic Active decoupling Technologies
- Total weight: 8 Ton (can be installed in any floor)
- Ergonomic design Improves Patient s' Comfort and doctors' work efficiency
- Full body RF Coils
- Up to 4 Channels
- Remote control table
- **VIVI X330 Can Install on Truck as Mobile MRI**

# RF Transmit and Receive

The Elixbo PM545 is based on a high-performance 4-channel RF sub-system.

## 2-ch General Coil

The special design apply for the coils to the body part under inspected at the most, which make the various parts imaging easy and possible.

## 4-ch Brain Coil

This 4-element brain coil is perfectly designed with integrated preamplifier for high SNR brain imaging. The maximum FOV is 26 x 21.5 x 25 cm.

## 2-ch Neck Coil

This dedicated neck coil is specially tailored to C-Spine and neck imaging with very close proximity to the anatomy. The coil includes pre-amplifier for high SNR.

## 4-ch Body Coil Large (20")

This 4-element body coil is specially tailored to spine and abdominal imaging. The FOV is 41 x 50 x 30 cm. Pre-amplifier is included for higher SNR.

## 4-ch Body Coil Medium (17")

This 4-element body coil is specially tailored to spine and abdominal imaging. The FOV is 41 x 42 x 28.5cm. Pre-amplifier is included for higher SNR.

## 4-ch Body coil Small (14")

This 4-element body coil with integrated preamplifier is tailored to body and spine imaging with enhanced filling factor for higher SNR.

## 2-ch Knee Coil

This 2-element knee coil with integrated preamplifier is tailored to knee imaging with 18cm L/R and 24.5cm S/I direction.

## 2-ch Shoulder Coil

This 2-element shoulder coil with integrated preamplifier is tailored to shoulder imaging.

## 2-ch Ankle Coil

This 2-element ankle coil with integrated preamplifier is tailored to dedicated ankle imaging.

## 2-ch Wrist Coil

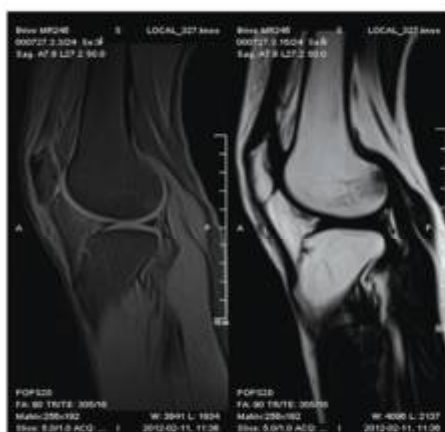

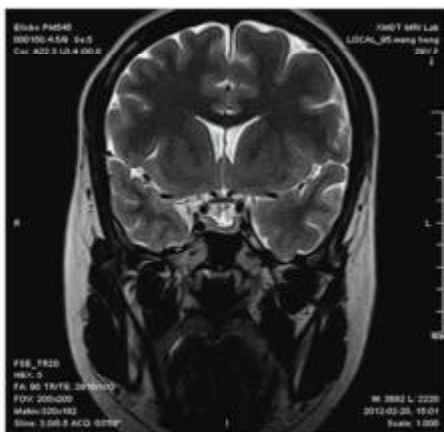

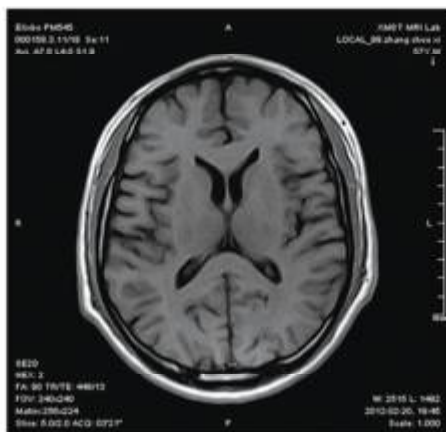

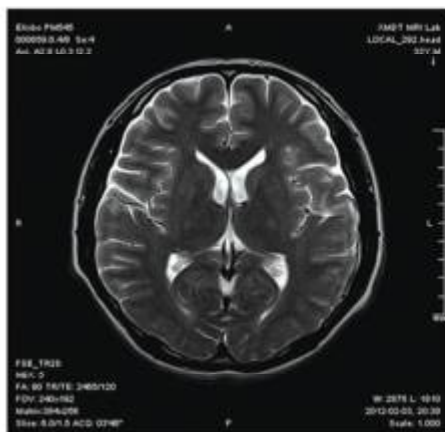

This 2-element wrist coil with integrated preamplifier is tailored to wrist imaging with 13 x 11.5 x 7 cm FOV.

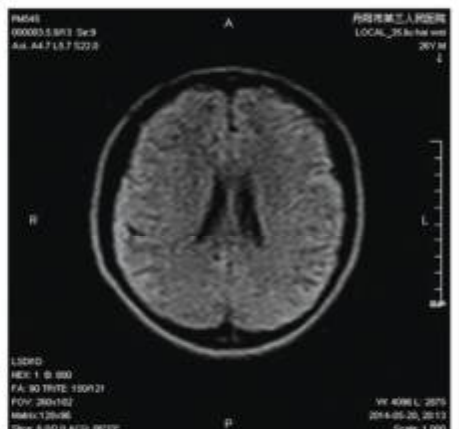

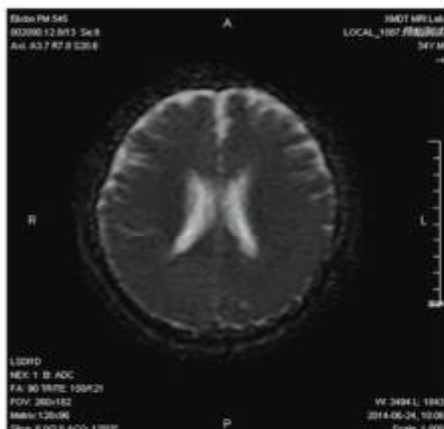

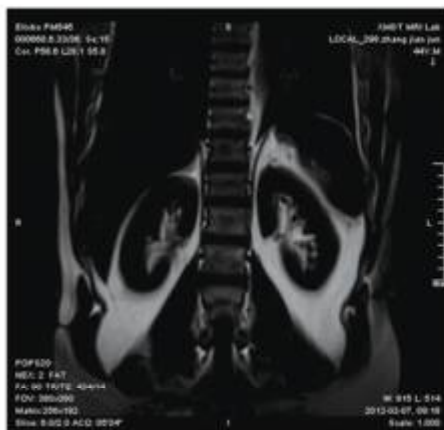

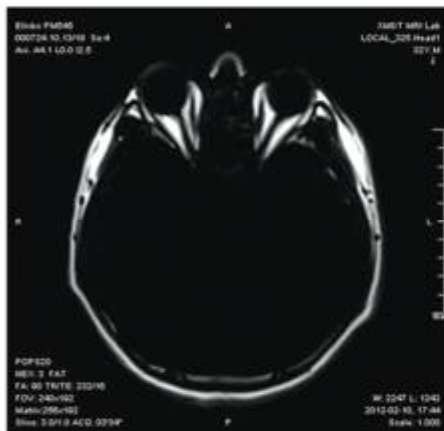

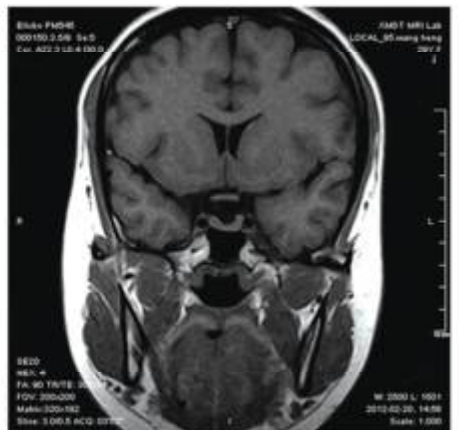

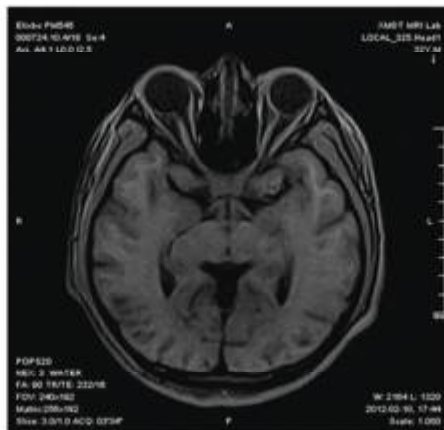

## 2-ch Breast Coil

This 2-element breast coil with integrated preamplifier is tailored to bi-lateral breast imaging.

# Extensive Clinical Applications

# Unique Clinical Applications

## Mobile MR

XBO Company is the OEM for GE healthcare USA.  
AS the only open permanent MRI supplier to  
GE Healthcare, XBO has been recognized as a  
trusted partner and received global reputation.
